## EDUCATION

**University of California, Los Angeles (UCLA)**
B.S. Cognitive Science & Computing | GPA 3.7 — Sep. 2023 – Jun. 2027

## EXPERIENCE

**JOOLA** · Product Design Intern — North Bethesda, MD · Jun – Sep 2026

- Prototyped a NetSuite-backed B2B order portal with buyer views for payment, live stock & order-history reorders and admin & sales-admin screens for warehouse notes & order types, designed to cut ordering from **2 days** to hours.
- Drafted buyer order flows & wireframes from sales-team interviews on failed payments, out-of-stock communication & manual NetSuite entry, refining the portal through **2** product-team design critiques to simplify distributor ordering.
- Designed & shipped a sticky add-to-cart & new WCAG-compliant components built with Claude Code in JOOLA's design system through eng & product QA, lifting add-to-cart **19%** in an A/B test of **100k** mobile & desktop site visitors.
- Raised average order value **14%** in an A/B test by designing & shipping a free-shipping progress bar with animated unlock fill & color change, a responsive order total & a mobile add-to-cart header that slides up to preserve cart space.

**Cursor (SpaceXAI)** · Campus Lead, UCLA — Los Angeles, CA · Jun 2026 – Present

- Teach **400+** students with **7** UCLA tech clubs to explore ideas in code with Cursor & integrate AI into product & personal workflows through hands-on workshops on MCPs, connector integrations, personal agents & workflow automation.
- Build live workshop demos of an agent queue that ships reviewed code changes, a scheduled Canvas assignment dashboard with lecture recaps & study guides, & a career help agent, showing students how agents fit daily workflows.

**Beacons AI** · Product Designer (Contract) — Remote · Mar – Jun 2026

- Redesigned deal tracking for **10k** creators by synthesizing **40** creator interviews with Granola AI, replacing a Gmail overlay & sidebar of brand briefs, rates & past videos with grouped brand-deal tasks in a to-do view adopted by Beacons.

**Dialogue AI ($6M Seed)** · Product Designer (Contract) — Remote · Dec 2025 – Mar 2026

- Designed & shipped an in-app AI chat for Dialogue's research tool, used by Meta, TikTok & Google, letting UX research teams ask plain-language questions across entire interview studies instead of digging through dashboard insights.
- Prototyped a generative UI system in HTML/CSS/JS over **5** design-review rounds, matching queries to chart, quote or video-clip cards by intent, available data & study goal, with tiered expandable detail views & a low-data state.

**Product Space** · Product Design Fellow — Los Angeles, CA · Oct 2025 – Present

- Hosted a workshop on building a portfolio with AI tools like PostHog, Sanity & Next.js, using Cursor & Grok Bot.

**BruinLease** · Product Designer — Los Angeles, CA · Oct 2025 – Present

- Designed & launched BruinLease to **100+** UCLA students in month one, translating **60** surveys & **12** interviews into Figma wireframes & high-fidelity prototypes with .edu verification & apartment reviews from Bruinwalk & Reddit.
- Designed & coded accessible UI, .edu auth, empty & edge-case states in the Next.js front end with Claude Code alongside a PM on the Supabase & Postgres backend, replacing raw dates with quarter chips after testing with **40** UCLA students.

**UCLA Campus Events Commission** · Director of Media Production — Los Angeles, CA · Dec 2023 – Present

- Direct a **12**-person team on Grammy-winning artists' concert brand design for **30,000** attendees & **20,000+** followers.

## INVOLVEMENT

**sviz** · Independent Creator — Mar 2021 – Jan 2025

- Founded sviz, a keyboard YouTube channel with **1M** views, partnering with SteelSeries, DROP, Glorious, & KBDfans.

SKILLS: Complex User Flows, Prototyping in Code, Design Systems, Interaction Design, Visual Design, UX Research, Accessibility

TOOLS: Figma, Paper, Cursor, Claude Code, HTML/CSS, JavaScript, TypeScript, React, Tailwind, Next.js, Supabase, Postgres, NetSuite, Hotjar
